APPRENTICESHIP

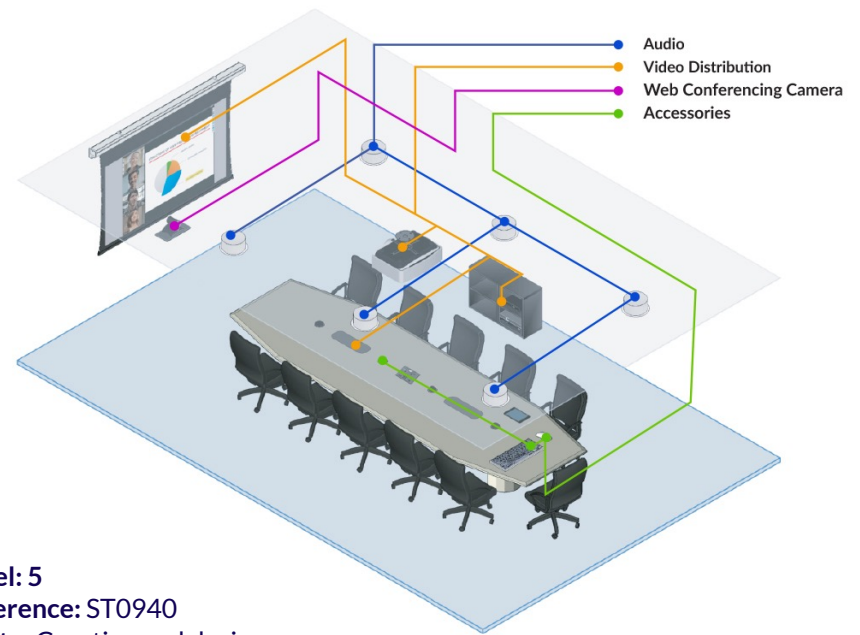

Overview

Level 5
Audio visual Technician
Apprenticeship

PROVIDE A BROAD RANGE OF PROFESSIONAL SOLUTIONS FOR COMMUNICATION.

The broad purpose of the occupation is to provide a broad range of professional solutions for communication including videoconferencing, hybrid in-person/online events, sound, lighting, projection, and computer networking by planning, installing, configuring, and operating hardware and software. AV hardware includes audio mixing desks, video cameras, public address systems, display screens, projectors, wireless microphone systems, recording devices, lighting systems, encoders/decoders, and network switchers. AV software includes videoconferencing platforms, digital audio workstations, video editors, media servers, sound-reinforcement design/control, lighting design/control, and computer networking tools. Integrated AV involves the combination, design, and system control of the hardware/software specified above to meet unique specifications. Depending on the context, a range of working patterns are applicable including standard office hours and shift work.

An employee in this occupation will be responsible, under minimal supervision, for design, setup, and delivery of audiovisual provision in accordance with the specifications of internal and external stakeholders. Depending on the core business of their employer these activities might be focussed on time-based events (online, in-person, and hybrid) or permanent communication systems. All of the above activity requires systematic project management skills, an evaluative approach, and the ability to synthesise client requirements, project specifications, and budget.

Level: 5

Reference: ST0940

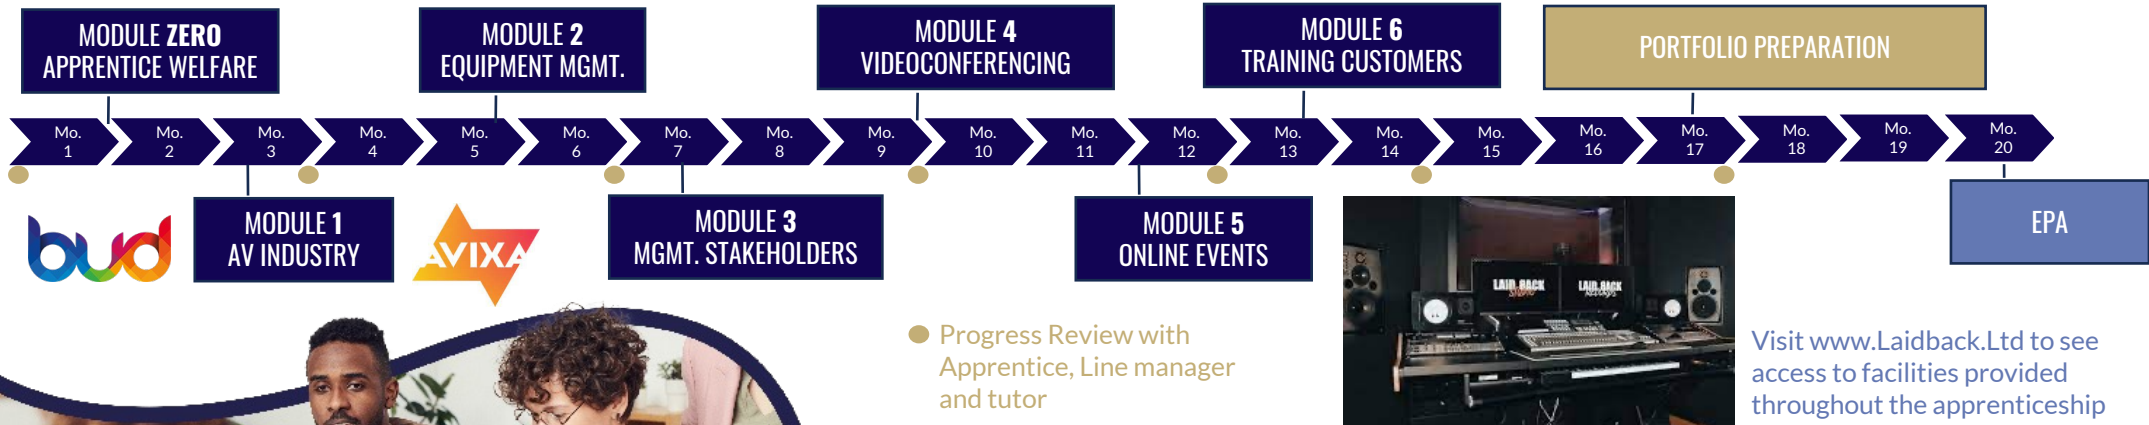

Route: Creative and design
